REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Concerning claims 1-38 there is no prior art that teach or suggest the method of detecting a nucleic acid comprising contacting a first nucleic acid to a second nucleic acid in which the second nucleic acid comprises a neutral or positively charged fluorescent label when hybridized to first nucleic acid and detecting fluorescence polarization of resulting mixtures. Linn et al teach a rhodamine dye bound to nucleic acid and fluorescence polarization. However, Linn et al do not teach that the rhodamine dye is neutral or positively charged. Dye charge is dependent on salt type and concentration of the buffer. The prior art does not explicitly teach or suggest the neutral or positive charged dye in the claimed fluorescence polarization method.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
